

CAER Community Awareness & Emergency Response

Industrial Medical Preparedness for Small to Medium Sized Companies

27 Sept 2006, 2-4pm @ SB Red Cross, 2707 State St.

Frequently, industrial medical preparedness means a formal in-house EMT team, however the moderate size of many local companies often make these teams difficult to establish & maintain.

If this is the case for your company, but you are still interested in what can be done to prepare for medical emergencies, you are encouraged to attend a presentation by Jack Armstrong of AZ Safety on Wednesday 9/27/06 at the SB Red Cross from 2-4 pm.

- ***New First Aid / CPR / AED Guidelines***
- ***Regulatory Requirements***
- ***Avoiding Litigation***
- ***Training Resources***
- ***Emergency Response Teams vs. Volunteers***
- ***Working with the Emergency Medical System***
 - ***Calling 911***
 - ***In house locators***
 - ***Advance coordination with Emergency Medical personnel***

Please RSVP to Craig Fry at 690-6654 or cfry@flir.com

We hope to see you at this informative presentation
